

Solid Waste

Welcome To Pend Oreille County's Solid Waste Division.

Here you will find helpful information about our transfer stations and recycling available in Pend Oreille County. Our transfer stations offer recycling of paper, corrugated cardboard and metal at no charge. For a fee we do accept freezers, refrigerators, and a/c units.

Please join us in keeping our County beautiful with volunteer activities like Adopt-A-County Road Program. You can adopt a one or two mile stretch of county road to volunteer to clean up twice a year. This helps us keep our roadways clean and litter free. Its great to keep some of the gorgeous views Pend Oreille County has to offer. For the generous donation of your time we give you a couple of signs letting people who pass that this is indeed a cared for stretch of road.

You can also be an active member in the solid waste solutions of our County by becoming a member of our Solid Waste Advisory Committee (SWAC). These meetings are a couple of times a year and open to the public. It lets us know how you would like us to handle things in your county. It gives you the opportunity to have your voice heard on issues like rates, services offered, and how the transfer stations operate.

Rates

- Deer Valley and Lone Transfer Stations: \$193 per ton plus tax-\$14.00 minimum charge (0-140lbs)
- Usk Transfer Station: \$27.76 per cubic yard plus tax-\$14.00 minimum charge (1-3 cans)
- Freon appliances (A/C, Freezer, Refrigerator): free
- Tires: tonnage rate

All loads inspected for hazardous materials. Loads found to contain asbestos materials will be rejected. All demolition/remodel loads subject to refusal without proper asbestos clearance documentation. Any customers with asbestos materials are referred to Graham Road Landfill for proper disposal. Demolition / Construction Debris & Asbestos

Any Demolition/Remodel debris must be tested. These activities allow for the presence of asbestos and the only way to know that the items do not contain asbestos contamination is for it to be tested.

EPA Category of Common Suspect Asbestos Containing Materials Note: This list does not include every product that may contain asbestos. It is intended as a general guide to show the proper categories of materials typically containing asbestos.

- Fireproofing (3,5,7)
- Stucco (3,5,7)
- Acoustical Ceiling Texture (3,5,7)
- Window Glazing
- Plaster (3,5,7)
- Cement Board/Transite
- Wall Texture (3,5,7)

- Caulking
- Ceiling Tiles
- Textured Paints/Coatings
- HVAC Duct Insulation
- Chalkboards
- Thermal System Insulation
- Lab Hoods/Table Tops
- Mudded Pipe Elbow Insulation
- Cement Pipes
- Linoleum Backing
- Cement Roofing Shingles
- Furnace Insulation
- Fire Doors
- Nicolite Roofing paper
- Asphalt Flooring
- Roofing Shingles
- Built-up Roofing
- Base Flashing
- Rolled Roofing
- Boiler/Tank Insulation
- Vinyl Floor Tile
- Mastics
- Home insulation

A copy of the documentation stating that debris is asbestos free must accompany each load that comes to the transfer stations. Loads that come into the transfer stations without proper documentation will be turned away until it is accompanied with proper documents. This protects the residents and Pend Oreille County against hazardous materials being disposed of at our transfer stations that we are not equipped or permitted to handle. [Mountain Laboratories](#) is recommended for testing by Spokane Regional Clean Air Agency.

Loads found to contain asbestos materials will be rejected. Any customers with asbestos materials are referred to Graham Road Landfill for proper disposal. [Graham Road Landfill | Management Facility \(Disposal\) | WMSolutions.com](#)

Any questions please ask site staff or call 509-447-3054 or 509-447-6458.

Asbestos Testing

Local asbestos testing labs:

There is one Spokane-area asbestos sampling lab that we are aware of: [Mountain Laboratories](#). You can also conduct your own search for accredited sampling laboratories in other areas of Washington and beyond.

Any questions please ask site staff or call 509-447-3054 or 509-447-6458.
